Title of the Thesis : New phenolate /enolate salts from electron-deficient
nitroaromatics and electron-rich species as potential
insensitive high energy density materials/ anti
convulsant agents - synthesis, characterization
through theoretical/spectral/thermal approaches and
single crystal XRD studies.

Date of Joining : Apr 2013
Date of Viva-voce : 14.02.2018
Year of award of Ph.D : 21.02.2018
